

NEW

Diamond Grit Holesaws — 25mm cutting depth

With a 25mm cutting depth, the new Sutton Tools Diamond Holesaw is designed for cutting rapidly through glass, ceramic tiles, laminates, fibre glass, hard plastics, plexiglass, fibre cement sheet, ceramics, graphite, marble and soft stone.

The new improved diamond coated tooth design and cut-out slots help to reduce the temperature while cutting, and therefore extends the life of the blade which allows it to make more holes before replacement.

- Holesaws must be used at slow speeds under constant flood of water. Over heating will destroy diamond bond.
- Use adjustable cutting guide for perfect cut in vertical and horizontal surfaces.

Diamond Coating
For long life in the hardest tiles

Cut-Out Slots
To dissipate heat

Thread Pattern
Made to international standard to accept all arbors
