BUY NZ MADE - PEOPLES CHOICE AWARDS AND EVACUT

Patience & Nicholson NZ Ltd are a proud member of the Buy New Zealand made organisation. As part of reaching 25 years the Buy New Zealand made organisation have created a Peoples choice awards, these awards give all New Zealanders the chance to vote online for your favourite Kiwi products and brands in a variety of categories. We are nominated in the in the "Most Loved" and "Most Iconic" brand categories.

Details of our entry are as follows:

"Most loved" is probably not the way most Kiwis would think about a drill bit or a drill set – well hopefully not, unless you work for P&N! However – can you do without a drill bit? Evacut (& P&N prior to a rebrand in the late eighties) can probably claim to have been part of just about every manufacturing, home building, construction or DIY project thats happened here since 1962 (50 years ago).

Kiwis certainly love making stuff and fixing things and at some stage they will probably need a drill bit, and it is likely they will use an Evacut product. The factory has been situated in Kaiapoi since the company first started, currently employs over 125 people, produces 60,000 drill bits every day contributes to our local economy in a way that only manufacturers can and has helped generate millions of important export dollars for New Zealand. It's fair to say Evacut is a quiet achiever, but it's still an iconic brand.

If your interested in New Zealand manufacturers and brands and would like to participate by voting in these awards please visit the Buy New Zealand made website (URL web page link below). We would appreciate your support for Evacut and other leading New Zealand brands and products. Voting has started already and concludes on the 18th October 2013.

P&N RIGHT ANGLE DRILL

ATTACHMENT P&N

P&N Right Angle Drill Attachment is designed for power drills, ideal for cordless drills: 2.4 volt to 18 volt. For driving at 90° or 45° where space is limited. The compact design of this attachment measures only 50mm wide allowing it to fit in tight spaces. The Heavy Duty 90° offset driver with 24 position gripped stabilizer arm is designed for power drivers.

PRODUCT CODE: 107RAD001

It has durable all-metal housing and steel gears with ball bearing construction.

FEATURES:

- The side support handle can sit in positions between 0°, 45° and 90°. Head rotates 360°
- Rated up to 500 in-lbs of torque with 2000rpm
- Accepts standard 1/4" hex shank bits
- Gripped stabilizer arm with two piece screwdriver bits storage

FOR P&N PRODUCT RANGE INFORMATION PLEASE CONTACT OUR CUSTOMER SERVICES TEAM ON 0800 553 236

NOTE FROM SALES

Having been lucky enough to be in San Francisco recently, have a tour through the ETNZ facilities and been out on the water watching the first race against Luna Rossa (where we lost two guys overboard), I like a vast number of kiwi's was disappointed in the final outcome of the America's Cup. Here's hoping the mood of the nation doesn't have a negative effect on the positivity of the last few months. We are seeing some good signs out in the market place and having talked to a number of customers, a large proportion of you are also conveying this, long may it continue.

Over the last few months we have released a number of new products, including the P&N Workshop range of TiNite tipped drill sets which come in both HSS and HSS Cobalt. These have depth gauge markings on the drill and each set has a drill size indicator. These are available in 6, 10, 19 and 25 piece sets. We have also just released the P&N right angle drill attachment which comes with 4 insert bits, the perfect tool for work in tight spaces.

We have also recently taken on a new range of cleaning products from the Pascoes group in Australia – the products are wide and varied, indoor/ outdoor cleaners, Automotive lines, etc. and our Territory Managers can give you any information you require.

Kind Regards,

Greg Stevens
New Zealand Sales Manger

PRIME MINISTER VISITS KAIPOI FACTORY

In August we were fortunate to get a visit from Prime Minister John Key and local MP Kate Wilkinson.

Mr Key and Ms Wilkinson spent over an hour in discussions with the management team and taking a tour of the Kaipoi factory.

It was a fairly informal visit and the Prime Minister took the opportunity to chat with quite a few of our team.

Great to see this level of interest in NZ Manufacturing.

Mr Key is pictured above speaking with our Kaipoi machine setter Gina Cowe.

STAFF PROFILE - JASON WALSH

Introducing Jason Walsh, our Territory Manager for the Auckland/Northland region. Jason has been with Patience & Nicholson for just over a year so will already be a familiar face to those in his area, for those who don't know Jason he has a background in metal fabrication and has, in a previous life, worked as a fitter welder.

Jason has a passion for modifying and restoring Classic American cars and also plays the drums in a couple of part time bands. He enjoys playing golf and watching most sports from the couch.

If you would like to get in touch with Jason he is available on 021 744 379 or jwalsh@evacut.co.nz.
